CUSHIONS & PILLOWS

Cushion Features: Removable cushions are available for all seating. Cushions are individually designed for each piece of furniture. Cushion inserts are made of synthetic materials that resist mildew, mold and other deteriorating effects of moisture. We offer straight stitch, luggage stitch and welting style seams.

Bonded fiber wrap is added to Westport, Penobscot and Campobello collections to improve softness, shape and appearance. Cluster fiber is a synthetic material that absorbs very little water. Both bonded and cluster fiber improve softness, shape and appearance when added to our foam inserts.

High quality nylon coil zippers are flexible, durable, corrosion and rust-proof, keeping moisture transmission to a minimum.

Pillow Features: Pillows are available in COM fabric, Sunbrella Marine Grade or Sunbrella Furniture Grade fabrics. Three sizes offered: 16" square, 18" square and 20" square. All pillows are filled with cluster fiber and require 1 yard of fabric. Welting is also available, but must be specified.

Fabric Selection:

- Cushion pricing is based on COM (Customer's Own Material).
- Cushions are also available in Marine-grade Sunbrella and Furniture-grade Sunbrella fabrics
- When using fabric with large patterns or stripes, increase yardage by 50%.

COVERS

The standard material used for covers is marine-grade Sunbrella. Furniture covers are form fitting with some looseness for ease of placement and removal. Where necessary, zippers are placed in the center of the rear panels to facilitate placement and removal. Zippers have an outer storm flap and an inner flap to shield furniture from abrasion.

Covers for chairs, benches, settees and the like typically have elasticized Velcro fasteners to hold covers firmly in place.

Table covers are secured under perimeter overhangs with individual flaps that part for placement and removal of covers. When in place, the overhang flaps are secured with Velcro. For tables with umbrella hole, a Velcro slit opens around the umbrella pole for placement and removal of the cover with the umbrella in place.

Important: The Weatherend Yacht Finish continues to fully cure and harden 60 to 90 days after application to reach its maximum durability. For this reason we do not recommend using your furniture covers for the first 60 days after delivery for light colors and 90 days after delivery for dark colors. When applying covers, tightly secure them to prevent chafing of the finish, especially in windy conditions. Touch up kits are provided should any chafing of the finish occur.

Marine Grade Sunbrella fabric colors can be found at Sunbrella.com. Please contact us at 800.456.6483 or sales@weatherend.com for more information or a quotation.

UMBRELLAS

Umbrellas have a separate wind vent to release gusts of wind, reducing risk of umbrella tipping over. Pole, ribs and finial are made in natural teak. Steel umbrella bases are wrapped in aluminum to resist typical corrosion with ground contact and are available in white and sand. Open/close system with three strand nylon line and brass pin. Hardware is polished brass. *Finial also available in brass, as shown.*

Sizes:

9' Octagonal - with 2" wood pole and ribs and 21" square aluminum wrapped base. Overall height = 8'9". Recommended for 48" and 60" diameter table.

11.5' Octagonal - with 2 1/2" wood pole and ribs and 24" square aluminum wrapped base. Overall height = 9'4". Recommended for 72" and 84" diameter table.

13' Octagonal - with 2 1/2" wood pole and ribs and 24" square aluminum wrapped base. Overall height = 9'4". Not recommended for tables; stand alone use only.

Canopy Fabric:

Sunbrella Fabric (marine/awning grade only for umbrella canopy).

Options:

Locking Casters
Storage Covers
Custom Lining
Painted Base
Polished Brass Finial
